Partial Hospitalization Program (PHP) - A 6-hour per day, 5-day per week daytime treatment program that utilizes group therapy and an individualized treatment plan, psychiatric evaluation and medication management to address a wide variety of client diagnoses. This program is especially beneficial for adolescents with a strong support system who struggle to manage symptoms.

Intensive Outpatient (IOP) - A clinician-led, 4-day per week group that provides more support than traditional individual therapy. Clients will discuss a wide variety of topics including healthy coping skills, emotional regulation, understanding mental health disorders, changing negative thought patterns, and modifying problematic behaviors.
